

JAIME GABRIELS

DEVOPS ENGINEER FORENSIC SCIENTIST

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience building production infrastructure and CI/CD pipelines. Successfully transitioned from 16 years as a forensic scientist, bringing systematic problem-solving and compliance expertise to cloud infrastructure. AWS SAA and Terraform certified with proven ability to deploy and maintain production systems. Currently maintaining LIMS application at LabDNA Scientific while building DevOps portfolio with Kubernetes, Docker, and monitoring stacks. Seeking DevOps roles where my unique background in regulated environments and quality assurance can ensure infrastructure reliability and compliance.

WORK EXPERIENCE

Software Developer & DNA Analyst

APR 2024- PRESENT

LabDNA Scientific | Cape Town, Western Cape

- Designed and implemented Laboratory Information Management System (LIMS) for paternity testing lab processing DNA samples through extraction, PCR, electrophoresis, GMID analysis, and reporting
- Developed React.js frontend with Node.js backend and PostgreSQL database for sample tracking
- Deployed application using Docker containers with GitHub Actions CI/CD pipeline
- Automated laboratory workflow reducing manual data entry by 70%
- Perform DNA analysis including extraction, quantification, amplification, and STR analysis
- Generate paternity reports and maintain chain-of-custody documentation

Software Development Consultant

OCT 2024 - PRESENT

Personal Home Lab & AWS | Cape Town, Western Cape

- Designed and implemented Laboratory Information Management System (LIMS) for paternity testing lab processing DNA samples through extraction, PCR, electrophoresis, GMID analysis, and reporting.
- Developed React.js frontend with Node.js backend and PostgreSQL database for sample tracking
- Deployed application using Docker containers with GitHub Actions CI/CD pipeline
- Automated laboratory workflow reducing manual data entry by 70%
- Perform DNA analysis including extraction, quantification, amplification, and STR analysis
- Generate paternity reports and maintain chain-of-custody documentation

EDUCATION

CODESPACE ACADEMY | 2024

Software Development Bootcamp

UNIVERSITY OF SOUTH
AFRICA SCHOOL OF
BUSINEESS LEADERSHIP |
2017

Master of Business Leadership

UNIVERSITY OF THE
WESTERN CAPE | 2017

B.Sc. Biotechnology

CERTIFICATIONS

AMAZON WEB SERVICES | 2025

AWS Solutions Architect Associate

HASHICORP | 2025

HashiCorp Terraform
Associate

PYTHON INSTITUTE

PCAP - Certified Associate
in Python Programming

CERTIFICATIONS IN PROGRESS

Certified Kubernetes
Administrator (CKA) | in
progress - expected
completion NOV 2025

Certified Kubernetes
Security Specialist (CKS) | in
progress - expected
completion JAN 2026

DEVELOPING SKILLS

Foundation

• Git • Python • Bash •
GitHub • Linux

Cloud & Infrastructure

AWS (EC2, S3) • Terraform •
Docker

CI/CD & Automation

Jenkins • GitHub Actions •
ArgoCD (Home Lab)

Development

React.js • Node.js •
PostgreSQL • REST APIs

Monitoring & Observability

Prometheus • Grafana • Loki

Expanding Knowledge

Kubernetes (K8s) • Ansible •
ELK Stack • Helm

Forensic Analyst

JUN 2008 - MAR 2024

SAPS Forensic Science lab | Cape Town , Western Cape

- Performed DNA analysis: preliminary testing, extraction, quantification, amplification, and STR analysis
- Generated forensic reports and provided expert testimony in court.
- Managed laboratory information systems (STRLAB and Forensic admin system)
- Implemented quality assurance protocols ensuring compliance.
- Automated data processing workflows using Python scripts
- Maintained chain-of-custody documentation for legal admissibility
- Processed 50+ cases monthly with 99% accuracy rate

TRAINING COMPLETED

Docker | Kubernetes | Jenkins | Ansible | Prometheus | Grafana |
ArgoCD | ELK Stack | OpenTofu

PORTFOLIO PROJECTS

Laboratory Information Management System (LIMS)

Live: lims.jagdevops.co.za | GitHub: github.com/GABRIELS562/JAG-LABSCIENTIFIC-DNA

- Production DNA sample tracking with React/Node.js/PostgreSQL
- Deployed using Docker containers with GitHub Actions CI/CD
- Processes samples through extraction, PCR, electrophoresis, and reporting

Zero-Downtime Deployment Pipeline

Live: finance.jagdevops.co.za & pharma.jagdevops.co.za | GitHub: github.com/GABRIELS562/zero-downtime-pipeline

- GitOps implementation with ArgoCD, 2-replica high availability
- Jenkins CI/CD with local Docker registry
- Achieved <60 second recovery from production incidents

Digital Evidence Pipeline

GitHub: github.com/GABRIELS562/digital-evidence-pipeline

- Forensic compliance monitoring on AWS EC2
- Applies chain-of-custody principles to DevOps
- Demonstrates unique approach to infrastructure auditing
